Arya Girigoudar

Software Engineer

arya.girigoudar@gmail.com | Bengaluru, India

SUMMARY

Software engineer based in Bengaluru, India. I build dependable products and practical data workflows, with an interest in making complex systems straightforward for the people using them.

TECHNICAL SKILLS

Languages: Python, C/C++

Frameworks: Django, Flask, REST APIs

Data: PostgreSQL, MySQL, SAP BODS

Other tools: Git, Grafana, Selenium, Machine Learning

EXPERIENCE

Software Engineer I | HirePro | Aug 2024 — Present

• Building reliable assessment and recruitment workflows through thoughtfully designed CRUD systems, codebase improvements, and question-paper management features.

BI Architect & DevOps Intern | Alcon | Feb 2024 — Aug 2024

• Designed ETL data flows with SAP BODS, Datasphere and Analytics Cloud, while automating repetitive work with Python.

Software Engineer Intern | Opsverse | Apr 2023 — May 2023

• Built data-driven customer emails, REST APIs and forecasting workflows using Flask, Grafana, LogQL and PostgreSQL.

PROJECTS

News credibility analyser

Transformers, Selenium, MySQL, Naive Bayes

• An AI-assisted tool that evaluates news credibility, scrapes articles with IP rotation, finds related history and tracks market sentiment.

Encrypted message app

Python, Sockets, TCP, RSA

• A WhatsApp-inspired socket chat application for securely exchanging messages, media and documents over TCP.

EDUCATION

Computer Science degree | PES University
